About me

Fourth-year Software Engineering student and self-taught Full Stack Web Developer seeking an internship to apply technical and programming skills in real-world projects. Skilled in Java and web technologies, with a strong passion for continuous learning and innovation.

Experience

Offline Exam Proctor Desktop App

Java | 2024

Created a Java desktop application to monitor and manage offline exams securely.

Web Developer

Travel Booking System

Developed a travel booking web application allowing users to search, book, and manage trips efficiently.

Subscription Tracker API

Backend API | 2025

- Designed and implemented a RESTful API to manage user subscriptions, renewal dates, and payments.
